

#310 ELECTRICAL SAFETY REFRESHER

NSTC 310, Electrical Safety Refresher

(3 Hours)

This course is designed to provide the student with a review of OSHA electrical standards, and the hazards associated with electrical installations and equipment. Topics may include single- and three-phase systems, cord- and plug-connected and fixed equipment, grounding, ground fault circuit interrupters, hazardous locations, and safety-related work practices. Emphasis is placed on discussion of those areas most pertinent to the class makeup and needs. This course is designed for those who have either taken the 3-day NSTC course 0309, Electrical Safety Standards, or who have a lot of experience working with electrical systems. It may also be used for those who have a need for only electrical safety awareness, and who do not work with electrical systems on a regular basis.

Target Audience: *Safety, Reliability, *Quality and Maintainability Professionals, *Supervisors, *Electrical Design Engineers, and *anyone working around or with electrical systems.

Dates:

**December 9, 2005
12:30 – 4:30**

Location:

Marshall Space Flight Center

**This course provides 1.8
Continuing Education Units**
